

Infinity

Design André Schelbach

The main character of this new side and coffee table program, next to the light and straight design, are the refined details on the feet, the variable heights and sizes of the tables and the special folding technique, with which the tables are made. With the variable sizes Infinity offers a solution for almost any requirement and can therefore be used for an incredible number of living situations. The design was still not affected by this variability and sets accents with the very thin and light look of the table top and the table legs with the incorporated metal core. Because of the special folding technique, the surfaces are available in leather as well as in microleather in different colors.

INFINITY is available in various versions:
