

Smart bedside table

Design André Schelbach

This variable bedside table and chest of drawers system was especially developed to fulfill the requirements of the box spring beds with their different heights. Bedside table with five different heights (30, 40, 50, 60 and 70 cm), two different widths (50 and 70 cm) and the choice of 1, 2 or 3 drawers leave nothing to be desired. Based on 38 different color and material designs you can combine the bedside table individually to almost every bed. An additional highlight is the option of an innovative power supply for your equipment with a triple socket inside the drawer or on the back of the cabinet. Mobile phones and tablets can easily be recharged overnight and the lamp on the bedside cabinet will be supplied with electric power.
